*Reasons for Allowance*

2. Claims 1,4,9 and 10 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As to claims 1,10, the prior art of record fails to teach or suggest, alone or in combination the recited system wherein the proxy server comprises a message ID recognition logic to identify notification message originating from the third party originator and a message screener to screen the response directed to the MMSC by the recipient as well as to identify the response sent in response to the third party originator. No prior art was found that discloses or teaches the limitations of the claims. Since claim 4 is dependent upon claim 1, the claim 4 is also allowed.

As to claim 9, the prior art of record fails to teach or suggest, alone or in combination the recited system wherein a message originator sends a notification message including retrieving information of a multimedia message directly to a recipient's device without the use of a multimedia messaging service center as well as a message redirector of a message handler, resident on the recipient's device, identifies the header of the response to determine that the response is for the originator in response to the notification message, and redirecting the response to the originator. No prior art was found that discloses or teaches the limitations of the claims.

Art Unit: 2614

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
